

AVZ103-R201

Outdoor drain channel 100 mm with metal frame and a cast iron grid D400

Application

For drainage of parking lots and similar areas, lane roads and other roads

Features

- Numerous ribbing for a firm fixation within surrounding material
- The drain can be simply cut in half to form two equal parts
- Metal vertical flange reinforces the drain edges
- The cover of the side opening can also be used as an inlet connector – Ø75 mm
- Material with UV stabilizer against aging, fading and degradation of plastic
- Material: polypropylene filled with talc resistant to mechanical, chemical and thermal damage
- Modular system – optional connection to form "I", "L", "T" or "X" shapes
- Prepared slots for using the locking bars to anchor the drain in concrete
- Ready for optional use of the odour trap with a grid for collection of the dirt
- Water connection from the side of the drain is possible at four locations – Ø50 mm
- Sophisticated and solid locking mechanism for simple connection of the individual drains
- Robust construction – self-supporting
- Cast iron grid – fixed to the drain with eight pcs of stainless steel screws, inlet slit width 11.6 mm
- Easy access to the drain – easy to clean
- Bottom outlet waste connection Ø110 mm
- Lock system allows easy connecting without additional fixing elements

Scope of supply

- Installation spacer 4 pcs
- Cast iron grid – 2x0.5 m – load class D400
- Stainless steel screws for fixing the grid to the drain, 8 pcs
- Drain body with metal frame
